

Easily Create Smart Buildings

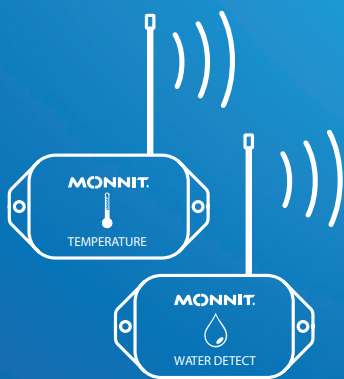

GET STARTED!

Every part of a building contributes to its overall value, quality, comfort, and appeal. Whether a hybrid office, industrial facility, medical clinic, retail outlet, or mixed-use developments, it can tell you how well its systems perform and the conditions you should keep a close eye on 24/7.

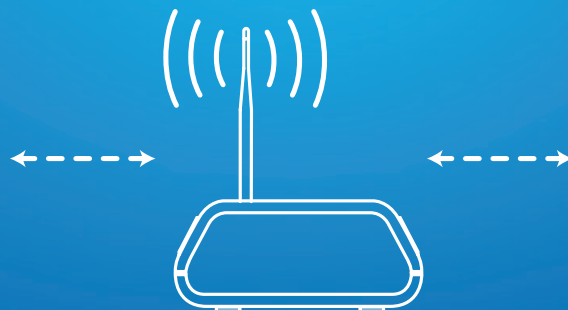

Building owners and managers can connect their buildings to the Internet of Things (IoT) to make them smart and ensure their facilities are in peak condition to please buyers, investors, and occupants.

Monnit Remote Monitoring Solutions can help you monitor nearly everything in your facilities—from HVAC systems and climate conditions to plumbing to electrical. Make your buildings smarter with Monnit.

Remote Monitoring for Building Operations

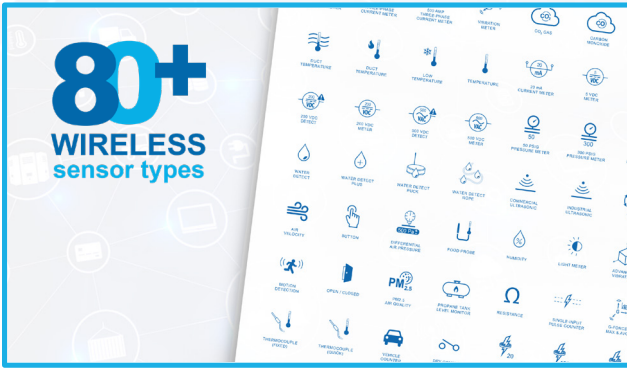

**80+
Sensors**

**Wireless Gateways
Cellular or Ethernet**

**Alerts / Data
in the Cloud**

More Than 80 Wireless Sensors to Fit Your Needs!
